Schedule spring training course

New Business

Mr. Kitchen reported the fire extinguisher inspections that were due for January 2018 have been completed and confirmation tags were attached.

The baseball field is in need of repair, especially the dugouts. Mr. Kitchen has submitted a proposal to Mr. Albaugh for repairs to address the most serious safety concerns, such as the uneven floors and loose wire and boards on the front of both dugouts. It is hoped these repairs will be done in the spring before baseball season begins. The larger repair items could be completed during the summer months. Several pictures of the dugouts were taken.

Other Items

None
